

Preparation guide sheet.

MPI – June 2017

*Trappers and Hunters **must** be registered to - MONTY 1/01

*Carcasses must be sourced from TB free and poison free areas

* **ALL PAPER WORK MUST BE COMPLETED AND ACCOMPANY EACH CONSIGNMENT OF BODIES**

* **NO GUT SHOT ANIMALS** - ANY GREEN OR GUT SHOT ANIMALS WILL BE REJECTED

* **NO SKINNED ANIMALS**

POSSUM. . Keep carcass clean

- Must be TRAPPED or SHOT- head/shoulder shots only. NO gut shots (Absolutely NO POISON)
- Minimum weight gutted 1.3kg
- TAIL GLANDS and TESTIS removed. Cut small amount of skin around the anus taking out the tail glands and up the tail about 50mm
- Gut cut 75mm from pelvis towards sternum. DO NOT cut sternum. DO NOT cut through the pelvic bone. ALL guts removed LEAVE IN HEART, LIVER AND KIDNEYS. Remove the guts/ intestine out the back passage and removing ALL DROPPINGS. Keep carcass clean
- HEAD and CLAWS removed. (Cutting just above the lower joint)
- Cut TAIL off at no longer than 25mm (1") stump
- Possums MUST be gutted within 3 hours of being killed, and frozen within 4 hours. Bodies must be stacked in a way that they cool down as quickly as possible
- We suggest approx. 10 per bag for easy weighing.
- Bags MUST be named or made identifiable i.e. coloured tape tied to bag

RABBIT / HARE

- HEAD/ shoulder shots only No gut shots (NO SHOT GUN)
- HEAD OFF
- GUT removed (leave in the heart, lungs, liver and kidneys)
- Minimum weight gutted 1kg
